## Rangatahi Rangahau Champions

An amount has been allocated in the budget to develop the capacity of taura Māori/rangatahi Māori in research, data collation and data dissemination. This extension from the priority area people leadership provides a pipeline to science research in a culturally appropriate way.

This will be confirmed under the 'people leadership' deliverable at the commencement of the project. Further, this investment reinforces Ngā Whaitua Hiranga Māori o Te Niwha, and the intergenerational contribution that this will have for this research programme.

Rangatahi Rangahau Champions will be involved in and will participate in wānanga as a way of ensuring succession is achieved and that intergenerational transfer of knowledge is a part of the process, to ensure that a rangatahi perspective and interpretation of information is also captured and understood. They will also play a role in the programme on a broader level.
